

WELLXTROL®

Amtrol Inc. invented the first pre-pressurized well tank over 50 years ago. This revolutionary product featured an innovative design using a hoop ring and groove to lock the diaphragm, liner and shell together in a totally unique way.

This tradition of innovation continued with Amtrol's Next Generation Well-X-Trol, which utilized high strength steel to deliver 150 psig working pressure – 20% higher than competitive well tanks. Backed by an industry leading 7 year warranty.

Now Well-X-Trol is combining its patent-pending Turbulator™ with an antimicrobial liner to deliver Clean Water Technology™ in every tank.

Well-X-Trol – the world's most trusted brand of well tanks; setting the standard for quality, reliability and performance.

Amtrol App makes sizing Well-X-Trol fast and easy. Available for iPhone, iPad and Android applications.

- 1946**: American Tube Products founded in West Warwick, Rhode Island.
- 1954**: Invented the diaphragm expansion tank.
- 1963**: Invented the pre-pressurized well tank.
- 1967**: Invented the refrigerant gas cylinder.
- 1972**: Built current Rhode Island manufacturing facility.
- 1975**: Entered the commercial products business.
- 1980**: Invented the indirect-fired Hot Water Maker®.
- 1986**: Invented the top coil indirect Hot Water Maker®.
- 1988**: Opened the Amtrol Education Center.
- 1991**: Invented the thermal expansion tank.
- 1992**: AMTROL registered ISO 9001.

The First and Still the Best.

The complete line of Well-X-Trol well tanks includes inline, stand, underground, wall hung, horizontal and pump stand models.

WELLXTROL®

7 Year Warranty

- Installers asked for it - we delivered.
- A Well-X-Trol exclusive and the best warranty in the industry.

High Strength Steel

- Deep-drawn domes are double the strength of rolled steel.

Multi-Dome Construction

- Provides internal bracing for added strength.
- Prevents diaphragm over-extension.

Heavy Duty Butyl Diaphragm

- The industry's thickest diaphragm provides extra strength and flexibility.
- Seamless design conforms exactly to the shell without stretching, creasing or forming bubbles that could trap water or sediment.
- Meets stringent FDA requirements.

Positive Diaphragm Seal

- Unique hoop ring and groove design secures the diaphragm, liner and shell for added strength and reliability.
- Exclusive welding process eliminates rough spots and sharp edges that can damage the diaphragm and liner.

Stainless Steel System Connection

- High grade stainless steel withstands aggressive water conditions.

Optional Pro-Access® Connection

- Piped to stand for fast, easy installation.

Well Above The Rest.®

150 psig Working Pressure

- 20% higher rating than competitive well tanks.
- Every tank is pressure tested for added safety.
- Precharged to 38 psig for the most common pump cut-in pressure.

Projection Welded Air Valve

- Eliminates leak paths found on threaded valves.
- Tamper-evident warning label for added safety.

Tuf-Kote™ HG Indoor/Outdoor Coating

- Stands up to the most severe conditions.
- Standard on all models; available in blue, tan and gray.

Antimicrobial Liner

Fresh Water Turbulator™

DuraBase® Composite Tank Stand

- Optional composite stand features patent pending design.
- UV resistant material is rugged and will never corrode.
- Available separately as a spacer for steel stand models.

Clean Water Technology™ in Every Tank

Antimicrobial Liner and Turbulator work together to keep tank surfaces clean.

Antimicrobial Liner Protection

- Neutralizes over 99.9% of bacteria on contact.
- Safe, Silver-Ion technology only targets active microorganisms.
- Long lasting compound protects water reservoir lining for the life of the tank.

Fresh Water Turbulator™

- Patent-pending diffuser agitates incoming water stream.
- Water-jet scrubbing action prevents sediment buildup.
- Eliminates stagnant water in VFD applications.
- Helps extend the life of the tank.

The Effective System Protection (ESP) sizing procedure covers modern residential water-use habits, heavy demands and the general increase in water use that has occurred in recent years. ESP sizing is designed to reduce system wear and lower energy consumption by keeping pump starts to a minimum.

Sizing chart is to be used in the absence of the VFD manufacturer's tank size recommendation. Selections include additional buffer capacity to minimize pressure fluctuation. A larger tank is always a system enhancement. Tank pre-charge should be set according to drive manufacturer.

Larger Tank = Fewer Cycles = Longer Tank and Pump Life.
