

# Installation Instructions

## 1. PARTS

Nipples

## 2. TOOLS NEEDED

Pipe Wrench

## 3. INSTALLATION INSTRUCTIONS

**IMPORTANT:** Do not apply heat to this fitting while making sweat connections. Sweat tubing to adapter before fitting adapter to the water heater. Do not remove the end inserts.

### ▲ WARNING

**HAZARD OF ELECTRICAL SHOCK!** Before removing any access panels or servicing the water heater, make sure the electrical supply to the water heater is turned "OFF". Failure to do this could result in DEATH, SERIOUS BODILY INJURY, OR PROPERTY DAMAGE.

### ▲ WARNING

Before servicing, turn off the gas supply to the water heater. Failure to do so could result in DEATH, SERIOUS BODILY INJURY, OR PROPERTY DAMAGE.

1. Turn Electrical power or Gas supply off to the water heater.
2. Follow draining instructions found in the water heater's operating manual.
3. Remove piping from hot and cold fittings.
4. Screw the nipples hand tight into the water heater. Then using a wrench tighten both water lines.
5. Reconnect hot and cold water lines.
6. Follow filling instructions found in the water heater's operating manual.
7. Restore electric power for electric water heater or follow lighting instructions next to the gas thermostat.
